Rajat Kumar Sharma Software Engineer

merajatsharma@outlook.com +91-8350864554 LinkedIn GitHub www.rajatkumarsharma.com

Full-Stack Software Engineer with 4+ years of experience building scalable web applications. Skilled in developing robust RESTful APIs (Python, JVM/Scala), asynchronous tasks (Celery, Redis), and ETL pipelines (Azure Data Factory). Proficient in state-managed UIs (React, Angular, Redux) and cloud-native infrastructure (Docker, Kubernetes, Terraform, Azure/AWS/GCP). Actively leverages AI coding assistants (Cursor, Claude, Codex) to accelerate development while maintaining strict production standards. Trained in Generative AI engineering, including LLMs, prompt engineering, RAG, multimodal AI, agents, MCP, observability, and deployment.

EXPERIENCE

Software Engineer, Reveal Healthtech 09-2025 – present | Bangalore, India

- **Dashboard & Analytics Workflows:** Built backend APIs and React (Vite, TanStack Router/Query) dashboards with FastAPI, MS SQL, and SQLAlchemy, delivering real-time visibility into 500+ daily appointments across 50+ clinics, reducing manual reporting time by 70% and enabling data-driven operational decisions.
- **Scheduling & Workflow Engine:** Architected Azure-hosted FastAPI microservices with SQLAlchemy/Alembic managing 10K+ monthly appointments across a multi-tenant healthcare platform serving 1000+ providers, achieving 99.5% uptime and reducing double-booking incidents by 99%.
- **SMS Communications & Automation:** Developed Twilio SMS automation delivering 100k+ monthly messages (reminders, follow-ups) via Dockerized services provisioned with Terraform, reducing no-show rates by 25% and saving 10+ manual hours weekly through automated patient engagement.

Software Engineer, Avathon (Formerly SparkCognition) 10-2024 – 09-2025 | Bangalore, India

- **Core Logistics & Backend Development:** Built a maritime logistics backend in Python (Django REST Framework) and Scala (Slick), delivering 70+ APIs for fleet/shipment management, KPI dashboards, data sync, and Reassign/Reconsign/Optimize workflows, cutting latency by 20–30% via DB pagination, optimized SQL, and caching.
- **Security, Auth & Automation:** Developed centralized Keycloak authentication for Python/Scala microservices and leveraged Celery, Redis for async tasks. Automated external data integrations via APIs, scraping, and cron-driven syncs.
- **DevOps, Stability & Collaboration:** Dockerized Python/Django/Scala services and used Terraform for reproducible infrastructure and CI/CD, strengthened logging/monitoring for stable releases, and co-designed API contracts and UI fixes in React/TypeScript, improving feature delivery speed by 10–20%.

Software Development Engineer, Buddi.Ai 05-2021 – 09-2024 | Chennai, India

- **MFA & Security Systems:** Designed, implemented, and dockerized a multi-factor authentication system using TOTP, HOTP, and email OTP to enhance application security beyond basic login.
- **Healthcare RCM, Workflow & Annotation Platforms:** Engineered and enhanced healthcare RCM, workflow, and annotation platforms with Play-Scala microservices, Angular/React, Kendo, Redux, and RESTful APIs, achieving ~70% automation, 95%+ claim accuracy, streamlined billing, reduced coding costs, enabled SMEs to prepare client demos, audit medical charts, and export results within 3–12 hours, and cut manual annotation/record-management effort by ~80%.

EDUCATION

Computer Science Engineering (B-Tech), Lovely Professional University 2018 – 2022 | Jalandhar, India

- **CGPA**: 7.88 | **Specialization**: Machine Learning and Robotic Process Automation.
- Technical Head at Aashary, a student organization at LPU.

AI Engineering Fellowship, Outskill 11-2025 – 08-2026 | Bangalore, India

- Generative AI Engineering Fellowship.

SKILLS

Frontend Developer
React, Angular, Redux, Design System, Micro-Frontend, Bootstrap, Tailwind, Material UI, Kendo, HTML, CSS

Backend Developer
FastAPI, Django, Celery, Redis, SBT, SQL, Slick, PostgreSQL, NodeJs, Alembic, SQLAlchemy, RPA, ETL, ADF, Kubernetes

Programming Languages
C, C++, Java, JavaScript, Typescript, Python, Scala

Other
Docker, Terraform, AWS, GCP, Azure, Cursor, Claude, Codex
